

APPENDIX II:

THE CHANGES TO THE CLAIMS:

Claims 1 to 9 have been canceled. Claims 10 and 11 have been amended as indicated in the following:

10. (amended) A means of producing at least one coating film on at least one area of a substrate surface, having at least the following elements:

- a) at least one storage container for at least one reactive coating formulation,
- b) at least one exposure unit, [preferably a UV exposure unit, more preferably a UV laser,] and
- c) at least one application unit having a nozzle, [in particular a spraying head,] and/or
- d) a bell for electrostatic application (ESTA bell),

wherein said at least one exposure unit is designed so that [the] radiation generated in said at least one exposure unit is brought into contact with said at least one reactive coating formulation in said at least one application unit.

11. (amended) [A] The means [as claimed] defined in claim 10, [wherein] further comprising at least one optical waveguide [is used in order to bring] which brings the [light generated in said at least one exposure unit] radiation into contact with said at least one reactive coating formulation in said at least one application unit.

Claim 12 has been canceled. New Claims 13 to 15 have been added as follows:

- 13. (new) The means defined in claim 10, wherein the exposure unit is a UV exposure unit.
- 14. (new) The means defined in claim 10, wherein the exposure unit is a UV laser.
- 15. (new) The means defined in claim 10, wherein the application unit is a spraying head.
